Administrative Regulations
Policy 121.0
Manpower Levels on Station During Calls

Purpose:

The purpose of this policy is to ensure proper manning of the fire department during times of calls inside our fire district and with our mutual aid partners.

Policy:

It shall be the policy of The City of Bryan Fire Department that at any time manpower on station drops below three (3) certified firefighters; the station duty radio operator will notify Command of this situation. Probationary firefighters do not count for available firefighters unless they have their firefighter certification.

Command will determine if mutual aid is required for move-up to standby at the station and the equipment and manpower needed for the coverage.

The station duty radio operator will then contact Central Communications and ask that the appropriate Fire Department be dispatched for standby at Bryan Station with the requested equipment.
